

Flutes were initially designed as a collection of suspension lights for the interior spaces of a hotel. Their potential and utility value, however, far exceed the demands of the original project. As the name implies, the simple yet elegant conical shape is reminiscent of a flute. Taking the same inspiration, the stylized openings serve a practical purpose by allowing the light to be directed at various angles depending on which opening the cable is passed through. This provides numerous possibilities for combining the lights in intriguing compositions. Flutes are available in several colours. The collection comprises three lights, each with a different degree of bevel on the open end of the shade.
